Reservation of Stalls - see Reg. 72. and 73.

Cancellation of Stalls - see Reg. 12.

ENTRY AND STALL BOOKING SYSTEM

There will be no maximum number of stalls that exhibitors can book per breed (including stalls booked for calves) - However there are ceiling numbers for each breed and once these are reached for any given breed, applications will be put on a waiting list. Where a breed ceiling is reached, the online booking facility will be withdrawn.

We wish to encourage Exhibitors to fill all the Stalls they book, whilst allowing them to make a greater choice of the animals they bring to fill those Stalls. An Exhibitor may make more entries than the number of Stalls they have booked, with the intention of making the final selection of animals to be brought to the Show to fill all their booked Stalls just prior to the event. Anyone who does not fill a stall/s with an animal will have that number of stalls deducted from their allocation the following year (unless there is a veterinary reason for the animal being unable to be shown)

Evidence of such is to be sent to the Competitions Department **before the 1st June**.

BRUCELLOSIS

Cattle from herds which are not under any restrictions may enter the Show. No movement permits are required.

Exhibitors must notify the Society's Official Veterinary Surgeons if any of their cattle calve or show evidence of calving at the Show. The animals will then be placed in the approved isolation boxes pending their possible early removal from the Showground. The decision of the Official Veterinary Surgeons in such cases will be final and they will also have absolute control of the boxes. Where an animal calves at full term a blood sample and a vaginal swab will be taken and examined at an approved laboratory. If the Rose Bengal Test (RBT) and microscopical examination of a smear made from the vaginal swab are negative, the animal may return to the Show lines provided permission is granted by the Official Veterinary Surgeons.

Where an animal calves prematurely or aborts, the chief steward, official veterinary surgeons and divisional veterinary manager must be informed immediately. The animal will be placed in isolation in approved accommodation, and the full range of samples (including, if at all possible, a placental smear) shall be taken. The animal will not be allowed to take part further in the show, and once fit to travel must return home to its registered premises, or, alternatively, be retained until the end of the show in isolation and returned with the other competing animals from the same premises.

All other bovine animals from the same registered premises will not be allowed to compete further until negative results from certain tests carried out by the veterinary investigation centre (rbpt and microscopic examination of a vaginal smear from the aborted animal) have been received. They can be returned home with the suspect animal at the end of the show.

ANIMAL WELFARE

With specific regard to the Royal Highland Show, each Exhibitor is responsible for the welfare of the animals that they bring to the Show. If in the opinion of the Show Dairy Cattle Stewards and/or the Veterinary Surgeon nominated by the Show, any animal is mistreated or presented for judging in anything other than an approved state, then that exhibitor will be barred from presenting any of his animals for judging and any prizemoney will be withheld.

Should any animal require treatment by injection for any reason whatsoever the veterinary officer, or failing that Chief Steward, must be informed before the action takes place and must be witness to the action.

Any exhibitor (or his representative) found to be using methods which could be construed as malpractice will be removed from the showground immediately along with his animals.

All animals may be subject to examination and tests and if any mal practise comes to light as a result, disciplinary steps will be taken.

Any exhibitor found to have contravened the rules in any way will be the subject of a report to the Show Cattle Committee which will discuss said contravention and decide upon appropriate disciplinary measures which will subsequently be ratified by the RHASS Board of Directors. A report will also be sent to the relevant Breed Society.

ANIMAL HEALTH REGULATIONS FOR CATTLE:

EXHIBITORS' ATTENTION IS DRAWN TO REGULATION (I) STATING THAT:

In the event of new Animal Health Legislation being enacted between the date of preparation of this Prize List and the date of the Royal Highland Show, then Exhibitors will be expected to abide by any new conditions of that legislation.

NOTIFIABLE DISEASE

Any animal which shows signs suggestive of a notifiable disease, e.g. FMD, B.S.E., must immediately be reported to the Society's Official Veterinary Surgeons and/or Chief Steward who will then inform the Divisional Veterinary Manager. All requests and instructions by the Official Veterinary Surgeons, the Chief Steward or the Divisional Veterinary Manager concerning the suspected animal must be complied with.

BOVINE TUBERCULOSIS

Any exhibitor bringing cattle to the Show from outwith Scotland must in the previous 60 days from the Show have obtained a negative TB result on all the Cattle being brought to the Show. Exhibitors from these areas will be sent the relevant paperwork to be completed by a private veterinary surgeon. Evidence of such is to be sent to the Competitions Department **before the 1st June**.

RECOMMENDED HYGIENE STANDARDS WITHIN THE MILKING PARLOUR

- ▶ All milkers should wear suitable footwear (clean, disinfected and waterproof, e.g.
- ▶ wellington boots), head wear (clean), milking apron (clean, disinfected and waterproof)
- ▶ No washing or clipping cows in milking area
- ▶ General personal hygiene, e.g. no smoking
- ▶ Hygienic removal of milk from cow to tank room, e.g. lid on bucket, clusters not dragging along floor
- ▶ Make full use of facilities provided, e.g. paper towels, strip cups, etc.

BOVINE VIRAL DIARRHOEA

All cattle (including calves) coming to the Show must come from a Scottish holding with 'negative' herd status for BVD, from a herd that is fully accredited free of BVD or they must all be individually tested free of virus (antigen) whether or not they have been vaccinated, in accordance with CHeCS rules (www.checs.co.uk).

Evidence of such is to be sent to the Competitions Department **before the 1st June**.

BRUCellosis

Cattle from herds which are not under any restrictions may enter the Show. No movement permits are required.

Exhibitors must notify the Society's Official Veterinary Surgeons if any of their cattle calve or show evidence of calving at the Show. The animals will then be placed in the approved isolation boxes pending their possible early removal from the Showground. The decision of the Official Veterinary Surgeons in such cases will be final and they will also have absolute control of the boxes. Where an animal calves at full term a blood sample and a vaginal swab will be taken and examined at an approved laboratory. If the Rose Bengal Test (RBT) and microscopical examination of a smear made from the vaginal swab are negative, the animal may return to the Show lines provided permission is

granted by the Official Veterinary Surgeons.

Where an animal calves prematurely or aborts, the chief steward, official veterinary surgeons and divisional veterinary manager must be informed immediately. The animal will be placed in isolation in approved accommodation, and the full range of samples (including, if at all possible, a placental smear) shall be taken. The animal will not be allowed to take part further in the show, and once fit to travel must return home to its registered premises, or, alternatively, be retained until the end of the show in isolation and returned with the other competing animals from the same premises.

All other bovine animals from the same registered premises will not be allowed to compete further until negative results from certain tests carried out by the veterinary investigation centre (rbpt and microscopic examination of a vaginal smear from the aborted animal) have been received. They can

be returned home with the suspect animal at the end of the show.

INFECTIOUS BOVINE RHINOTRACHEITIS

Separate facilities will NOT be provided for cattle in the scheme's IBR Category.
